Graffiti

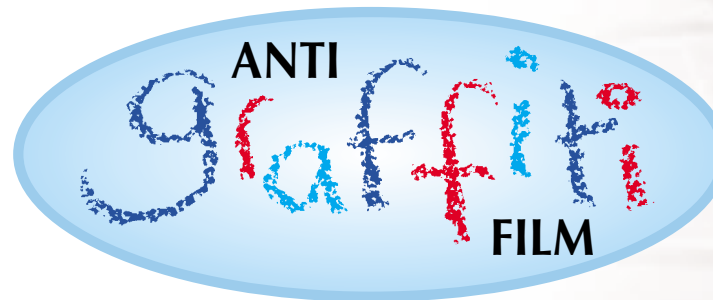

Disfiguring and abusive graffiti is a depressing reality of urban life. Vandals strike wherever there is a suitable surface and experts agree that in order to combat its demoralizing effects it is important for it to be erased as quickly as possible.

There are tempting areas of glass and mirror on public transport, in stations, toilets, shops and lobbies where graffiti 'artists' 'tag' their mark, etch their abuse and cause thousands of pounds of damage.

LAMINATES

The Ultimate Protective Barrier...

AGAINST - PAINT, PENS, GOUGES
SCRATCHES & ABRASION

New, super-clear anti-graffiti film foils the graphic vandals. The film lets them make their statement, spray their tag, have their fun without damage to the underlying material. The graffiti can be cleaned off using normal cleaning materials. If and when the film is in need of replacement, it's quick-release, low tack adhesive allows it to be removed easily and cleanly and a new film applied cheaply and simply.

- Graffiti Film has a wipe-clean scratch resistant coating to shrug off spray, paint and pens using only basic cleaning materials.
- Graffiti Film's flexible multi-laminate construction protects the underlying surface from scratches, gouges and nicks.
- Low-tack quick-release adhesive allows speedier removal, without leaving sticky marks.
- Suitable for interior and exterior glass, mirrors, marble, stainless steel and many other flat smooth surfaces.
