

Window Films for Domestic, Commercial, Industrial & Motor Vehicle Applications.

Expert Advice & Survey

We are highly trained and experienced in the uses and specifications of all our films. Without obligation we will carry out a free survey to help define your problems and assist in the choice of the film or films best suited to address your needs.

Guaranteed Products

All products are rigorously inspected during and following manufacture to maintain our very high standards of quality, performance and strength, they are tough, scratch and fade resistant and are subjected to continuous testing and meet all relevant British Standards. All internally applied films are provided with a minimum five year guarantee.

Installation

Our installation teams are industry professionals and will carry out the work quickly and cleanly, causing little or no disruption to your normal routine.

SOLAR CONTROL Window Film

Nothing better under the Sun!

SOLAR CONTROL WINDOW FILMS

Sun-Gard solar control films provide the highest solar energy rejection available, while dramatically improving the appearance of offices, commercial and industrial buildings.

Choose from a variety of decorator colours including silver, bronze, grey, green, gold and blue. In addition to energy savings, the solar control film from Sun-Gard provides privacy and increased security.

- Solar energy rejection up to 79%
- Modernises the look of older buildings
- Reduces fading of carpets, furniture and fabrics
- Superior scratch resistant coating
- Less glare
- Reduces harmful UV rays
- Improves shatter resistance in glass
- Backed by manufacturer's warranty
- Available in a wide variety of colours
